Using Microsoft Internet Explorer

Be sure to have Window's Media Player set as your default media software. To do this:

1) Click the Start Button
2) Click 'Default Programs' (Figure 1)
3) Click the 'Set Program Access and Computer Defaults' option.
4) Under "Choose a configuration" select either Microsoft Windows or Custom (depending upon your preference)(Figure 2) and ensure that that Windows Media Player is selected as your default media player (Figure 3).

Using Mozilla Firefox

To automatically stream these files in Mozilla Firefox download the free VideoLAN plug-in by following the steps below: (Note: This software will require 81 MB storage on your computer)

1) Visit the VideoLAN website at :http://www.videolan.org/vlc/ (Figure 4)
2) Click the 'Download VLC icon.
3) Follow the prompts in the VLC media player 1.1.11 Setup Wizard until reaching the 'Choose components' (NOTE: Setup Wizard should start automatically.)
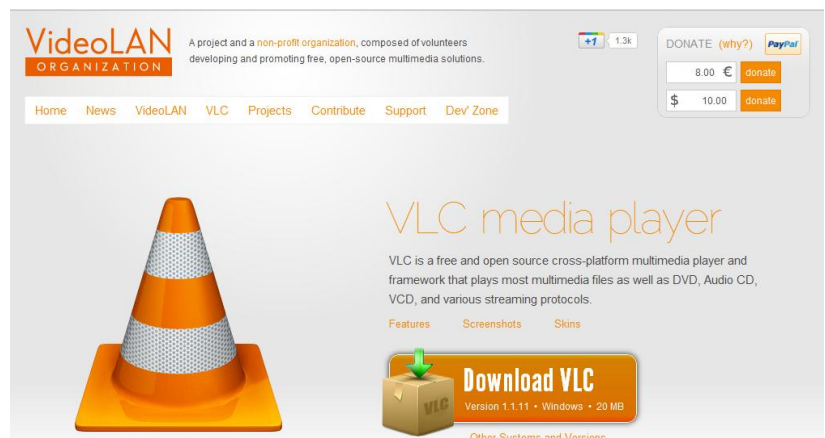

Figure 4

4) In the 'Choose Components' window make sure 'Mozilla plugin' is checked, then click "Next to finish the setup. (Figure 5)
5) WMV files should now automatically start streaming when they are clicked upon.
